of our various escapes from predicted ruin in the past, for "history is past politics and politics is present history." This country has frequently been just toppling over the high of descent the highest are generally using toppling over the brink of destruction, but it has always found a soft landing place and gone on more flourishing than ever. When Jefferson's election seemed assured, the impending catastrophe appeared so awful to conservatives that they were ready to resort to any chicanery to defeat the will of the people, just as the "better element" is preparing to do now to prevent

> This readiness of an honorable man to resort to dishonorable means of preventing the success of his opponents is characteristic of the defenders of "property and order" in a panic. There is no more unscrupulous fighter than an alarmed "good citizen," as the suggestions of wholesale bribery repeatedly offered by the conservative organs in the present campaign abundantly show.

It is rather entertaining to notice that not only in general principles, but even in the minutest details, the history of our earliest politics is repeating Doubtless the bolt of Mr. Eckels will itself. Thus one of the most shocking features discovered by the new Toryproduce a flop on the part of Mr. Thur- ism in the Chicago platform is its alleged attack on the judiciary. Exactly the same charge was brought against the Jeffersonian Republicans. "In the Hon. Andrew D. DEMOCRATS AND THE SUPREME COURT.

Our contemporary in the Tenderloin precinct, the Herald, is distressed over that clause in the Chicago platform which suggests the reconstruction of the United States Supreme Court, to the end that its decision in the income tax case may be reversed. To a correspondent who inquires how this may be accomplished, the Herald answers that if elected, and if vacancies occur in the court during his term, Mr. Bryan will fill them with appointees known to believe in the principle of an income tax. Such a course apparently impresses our contemporary as reprehensible, but it is, after all, only following time honored precedent. The dignity of the Supreme Court and its absolute incorruptibility have blinded the people to the fact that it is essentially a political tribunal, made up almost without exception of men who have been active partisans, and who owe their appointments quite as much to political endeavors as to their legal attainments. We may rest quite assured that should Major McKinley be elected and have a vacancy in the Supreme Court to fill the appointee will be a believer in the theory of protection-a theory, by the way, which has been only mentioned by the Supreme Court to be condemned.

Respect for the Supreme Court of the United States need not blind the people to the fact that it has not always been consistent in its interpretation of the law; has not, indeed, failed to reverse its own decisions, not once or twice, but a dozen times. The Democratic plank in support of an income tax asserts no falsehood when it sets forth that the adverse decision of the court on that tax reversed "decisions of that court for nearly one hundred years, that court having in that decision sustained constitutional objections to its enactment which had previously been overruled by the ablest judges that ever sat on that bench." Though perhaps the most unfortunate instance of its varying moods and tempers in construing the law, the income tax decision is not the most striking one recorded in the records of the Supreme Court. It would, indeed, be futile to hope that a tribunal, constantly changof selfishness. Is the President a sel- A TRIUMVIRATE OF GENIUS. swim and whirled backward.
